

Part 1:

UiPath Platform and Support Setup

In this part, you will get an overview of the UiPath platform and learn about the UiPath Orchestrator and robot setup. In addition to this, you will also learn about the RPA support framework and model, the best practices in designing and implementing an RPA support strategy, RPA support components, and finally, the best practices in setting up deployment, monitoring, reporting, and continuous improvement initiatives.

This section contains the following chapters:

- *Chapter 1, Understand UiPath Platform Constructs and Setup*
- *Chapter 2, Define UiPath Support Strategy, Framework, and Models*
- *Chapter 3, Set Up UiPath Support Enablers*
